

Why i1 to rule the world

Master's Thesis - Exposé July 24, 2024

Author: Texy McTexface
Advisor: The Very Best, M.Sc.
Examiner: Prof. Dr.-Ing. Felix Freiling

1 Motivation

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

2 Problem Statement

This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

3 Related Work

And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

4 Concrete Goals

After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place.

```
1 #I am a comment
2
3 def just_for_testing(derp):
4     return "test"
```

Figure 1: I am a caption.

If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

5 Roadmap

WEEK 2 – 4 This and that.

WEEK 4 – X Literature.

WEEK X – Y ...

WEEK Z – 21 Writing and printing.

In the following, there are some usage examples. Related work may be cited via [1] if you only need a reference, or you can automatically include the authors’ names via Fratantonio et al. [1].

English quotations are done “like this”. If you are unsure, you can also do it “like this”.

Referencing a point inside this document works like this: Section 1 and will point to a pre-defined label. Code in a Figure is depicted in Figure 1. It is okay that the figure floats to the top of the page.

Footnotes work intuitively¹.
